

# MAXI-TIP

## LONG LIFE BELT SCRAPERS

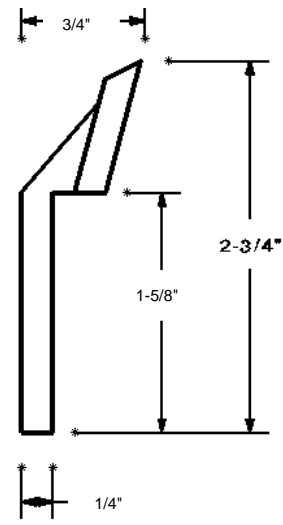

12/2011

MAXI-TIP 1 and  
MAXI-TIP 2

MAXI-TIP or MAXI-TIP II  
Shown in BLADE HOLDER

MT Dual Durometer  
Rigid Base w/ Flexible Tip

- **THREE DESIGNS FOR PERFORMANCE IN ALL APPLICATIONS**
- **SPECIAL POLYMER COMPOUNDS FOR LONG SERVICE LIFE**
- **IN-STOCK FOR IMMEDIATE UPS SHIPMENT**
- **MAXI-TIP and MAXI-TIP II APPROVED FOR *FDA/USDA/DAIRY***
- **Now available in Metal Detectable compounds**

**MAXI-TIP 1** is manufactured from abrasion resistant TPU resins for stability and toughness. Life spans of 4-6 times that of similar plastic scrapers have been reported. Moderate Flexibility also allows easy assembly on trough angles, V-Plows and “arc” mounts.

**MAXI-TIP 2** is used when applications require greater rigidity and stiffness. This scraper is excellent for pulley cleaning, heavy product plowing and general applications.

**MT Dual Durometer** is a co-extrusion with a rigid base for mounting and a flexible tip all in one piece. The larger base allows for direct mounting to cross supports and frames, where a Blade Holder cannot be installed.

**BLADE HOLDER** 6005-T6 Clear Anodized Aluminum Extrusion which keeps Maxi-Tip 1 and Maxi-Tip 2 scrapers properly oriented to the work area. It maintains constant, even pressure over the blades entire length. Scrapers can be easily removed for clean up. Blade Holders helps keep your conveyor clean, neat and sanitary.
